PROJECT DESCRIPTION

THE COMPANY, WHAT IS ATAS

Let me introduce myself, I am Valentina Cutolo-Rampazzi co-founder and creator of ATAS, a certified ballet teacher from the Royal Academy of Dance in London (one of the most important ballet companies in the world), as well as a ballet dancer. I have accumulated a decade of experience as a ballet teacher, preparing 13-19 year olds to enter the professional world of Dance and Performing Arts with 100% success as well as preparing 4-19 year olds for the Royal Academy of Dance amateur, semi-professional and professional exams always with 100% success. My long experience within Danielle Brunner's school The Moving Factory has allowed me to consolidate excellent knowledge about the effective and functional management of a Dance school, both on a practical and bureaucratic level, and today I feel I have the physical and organisational potential to launch myself into the sector with a new proposal that will not only offer dance, but will unite all the performing arts under one roof.

Accademia di Arti Sceniche Ticinesi is a project that was born about five years ago in an undefined manner and takes shape today. From the union of three siblings, Valentina (dancer), Veronica (actress), Emanuele (musician) and other valid collaborators, a well-thought-out school is taking shape, with an innovative composition as well as a well-thought-out range of services, and a young and proactive team that will carry the project forward.

Working relationships will materialise through fixed-term/indefinite-term hires and collaborations. There will be different teachers for the various disciplines and external collaborators for workshops, marketing, social media and website management.

SUMMARY OF ACTIVITIES

ATAS is the first performing arts academy in Ticino for adults, young people and children from 3 years of age that brings together dance, theatre and music in one location. We hope to become an extracurricular and extra-work structure that can offer high-level activities and training for all those who want to work and develop new skills in the field of the performing arts.

We offer well-defined curricula at pre-professional level in most areas, as well as courses of a more playful nature suitable for keeping mind and body active.

We are in the process of setting up our premises in Locarno, which will consist of four professionally equipped rooms for sports and music, an atrium, three changing rooms with showers, two bathrooms and two locker sections.

PRODUCTS AND SERVICES

ATAS offers courses in classical dance, modern dance, break dance, jazz, singing and acting courses, instrument courses, music production courses, theory and solfege and a professional recording studio.

Our services come in the form of predefined packages depending on the direction the customer wishes to take, as well as packages that can be customised if a pre-professional route is not desired.

In addition, we have the possibility of subletting the spaces we set up to third parties, thus generating additional income for us.

COMPETITION

From a competitive point of view, after a qualitative sample survey through interviews we were able to conclude that:

- There is demand for extracurricular activities in the arts
- There is a preference for activities located in central areas
- The possibility of practising several disciplines in the same location is very much in demand given the problems of travel (the journey to activities by the pupils' parents weighs heavily)
- The landscape of existing schools is very static
- There is a strong demand for space for sports/artistic activities (shortage of space)

Our formula is new and unique throughout the territory. It aims, through the union of the various arts, to offer a more complete education than other schools. We will offer practical and theoretical courses for the various fields, and we will also be supported by some teachers for school subjects such as Maths, English, French, German and Italian to ensure that students can better manage school and extracurricular activities. In addition, as mentioned above, we have the possibility of subletting equipped spaces.

WHY THIS PROJECT CAN SUCCEED:

- Designed on the basis of already existing and well-functioning schools with the addition of dynamism and strong networking.
- Composed of a young and high-level team of teachers.
- We offer services that are uncommon in Ticino such as: lessons and training for adults and lessons for the over 65s.
- We follow and collaborate with events in the Locarno region (Film Festival, Jazz Ascona, Moon & Stars and others).
- We are optimally located for the entire Locarno region.
- We are located in the canton with the greatest affluence of tourism and its resulting demand for cultural and performance entertainment services.

- And, above all, because we are creating something new and ambitious, which we hope will become a high-level training centre.
